INDEX.

ACCIDENT at Holte's Theatre, 54
Action of a magnet on a current, 298
Ader, M., experiments by, 247
" " new instances of magnetic attraction, 214
Ager's, telegram code (Review), 89
Aggasis', M., battery, 318
Alcohol, production by electricity, 391
Alternating current machine, 150
American electrical patent, 125
" fast speed automatic, 400
American Rapid Telegraph Company, 336
Anderson, Mr., sentence on assassins of, 336
Anderson, R., on the necessity for a regular inspection of lightning conductors, 328
Anderson's, Dr. Tempest, heliograph, 308
Anderson's patent battery, 194, 230
André's lamp at Royal Exchange, 198
Anglo American, cable breakage, 140, 142
" " cable repair, 166
" " cables new, 148, 304
" " Electric Light Company, 231 ; Corporation, 432.
Atlantic Cable Company, New, 377
" " Companies, joint purse arrangement, 304, 322, 340
Attorney-General *v.* The Telephone Company, 70, 422
Aurora Borealis, 299, 390, 405
Australia, news from, in five hours, 277 ; telephones in, 278
Automatically recording notes played on a piano, 197
Ayrton and Perry's photometer, 406

BACTERIA and strong electric currents, 214
Balmain's luminous paint, 55
BATTERIES—
Agassis', 318
Anderson's, 194, 230
D'Arsonval's, 318
Ponci's, 125
Rendering more efficacious, 142
Reynier's, 247, 270, 405
Secondary, with carbon electrodes, 261, 269
Slater's, 25
Wöhler's, 309
Becquerel, M., on magneto rotatory polarisation of rays of light, 246
Bell, Professor Graham, prize to, 233 ; on the photophone, 390
Berlin Electrical Railway, 59, 124
Berliner's microphone, 86, 406
Bert's, M. Paul, microphone transmitter, 124
Bidwell, Shelford, on the photophone, 399
Bismuth deposit on iron and steel, 142
Blackpool, electric light at, 123
Blake and Edison transmitters, 15
Block telegraph instrument, 158
Block telegraph instrument, W. R. Sykes' double arm, 205
Bloomfield's patent insulator, 332
Blyth, James, on currents produced by friction, &c., 326
Bouty, M., on the Peltier phenomenon, 371
Boys, C. V., a liquid voltaic arc, 46
Brass plating, 264
British Association, 262 ; Electrical Standards' Committee, 336 ; grants, 318 ; meeting, 285, 305
Brockie's electric lamp, 114, 407
Brooks' underground telegraph system, 198, 215, 231, 279, 301, 337
Brush electric light, 12, 404 ; in America, 177 , in Cleveland, 230 ; on the *Inflexible*, 196 ; at Kensington, 177 ; in New York, 370
Buoy, Johnson & Phillips', 190

CABLE—
Abermawr-Wexford, 14
to Bermuda, 86
Cadiz and Canary Islands, 179
Cape, 14
Cuba and Jamaica, 179
French Atlantic, 14, 33
Great Northern Telegraph Company's new, 390
in Gulf of Mexico, 71
Hong-Kong and Luzon, 184
identifying a submerged, 223
Manilla and Hong-Kong, 105
New Atlantic, 266
Panama and Mexican, 301
property, 77
St. Thomas and St. Kitts, 14
CABLES—
experiments on Australian, 231
fast speed working on, 377
Marseilles-Algiers, 280, 318 ; and cheap telegrams, 222
New Anglo-American, 148, 319
in Peru, 318
Singapore, Java, Port Darwin, 177
Submarine, 278
Canadian Pacific Railway as a telegraph line, 299
Cance's dynamo-electric machine, 346
Caoutchouc, prize for substitute, 71
Cape Observatory, 405
Chauvin, M. Von, 268
Charterhouse Science School, 337
Chasse's mutiplex telegraph, 142
Cheap telegrams, 246
Choate's Van, relaying of the Atlantic Cable, 406
City and Guilds Institute, 263, 301
CITY NOTES—Telegraph Companies, &c.—
